The Statue of Liberty

One of the most famous statues in the world stands on an island in New York Harbor. This statue is the Statue of Liberty. The Statue is a woman who holds a torch up high. She symbolized a welcome to a land of freedom. Visitors can go inside the statue. It is so large that as many as 12 people can stand inside the torch. Many more people can stand in other parts of the statue. It weighs 225 tons and is 93 metres tall.

The Statue of Liberty was put up in 1886. It was a gift to the United States from the people of France. In 1776 France helped the American colonies gain independence from England. The French wanted to do something special for the US centennial, its 100th birthday.

Laboulaye was a well-known Frenchman who admired the US. One night at a dinner in his house, Laboulaye talked about the idea of a gift. Among guests was the French sculptor Frederic Auguste Bartholdi. Bartholdi thought of a statue of liberty. He offered to design the statue.

Many people contributed in some way. The French people gave money for the statue. Americans designed and built the pedestal for the statue to stand on. The American people raised money to pay for the pedestal. The French engineer Alexander Eiffel, who was famous for his Eiffel Tower in Paris, figured out how to make the heavy statue stand.

a. Complete the sentences:
